DETAILED ACTION

Response to Amendment

This Office Action is responsive to the Amendment filed October 30, 2007. The rejection of claims 7-12 under 35 U.S.C. 112, first paragraph as failing to comply with the enablement requirement is overcome. However claims 7-12 & 17-27 are newly rejected under 35 U.S.C. 112, first paragraph for scope of enablement.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 7-12 & 17-27 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for intermediate storages such as capacitors or accumulators, does not reasonably provide enablement for any type of intermediate storages. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected,

Art Unit: 1795

to make the invention commensurate in scope with these claims. It is unclear as to whether the biocatalytic fuel cell is compatible with any type of intermediate storages. An appropriate correction is required.

Response to Arguments

Applicant's arguments with respect to claims 7-12 have been considered but are moot in view of the new ground(s) of rejection.
